### Kongamato

The Kongamato, whose name translates roughly to "breaker of boats," is a terrifying flying reptile of Central African folklore. Natives and explorers have described it as a large reddish-black lizard with membranous wings devoid of feathers. According to legend, the Kongamato was notorious for overturning fishing canoes and attacking anyone who ventured too close to the riverbanks. Villagers would often carry charms before approaching the water, believing the riverbanks to be the creature's nesting ground.

Driving rhythms and a brisk tempo are at the center of the work. Beginning rather intrepidly, the music couples haunting melodic lines with moments of both intensity and tenderness to offer a vivid yet ghastly picture of the eerie creature.
